

### Summary:

Working as SQL, Oracle Database Designer and Developer around 5 years of Experience. My responsibilities are Requirement gathering from onshore and Client IT team, Requirement estimations for Development, testing, SIT & UAT. I was involved in Production Support issues and helped Support team in resolving the issues. Having strengths of Excellent analytical, problem solving, communication and interpersonal skills, with ability to interact with individual.

### Technical Skills:

<b>Tools</b>	MS-SQL, PL-SQL, HIVE, Snowflake, Azure Devops
<b>Operating Systems</b>	Windows.

### Professional Experience:

- **Inventurus Knowledge Solution(Light beam)**, Hyderabad from October 2022 - Present
- **Genpact Headstrong Capital Markets (NOMURA)**, Mumbai from October 2020 – October 2022.
- **Sutherland Global Services**, Mumbai from July 2019–September 2020.

### Project Details:

<b>Project Name:</b>	Health insurance
<b>Role:</b>	Senior Product Engineer
<b>Environment:</b>	MS-SQL -2012,2016, PL/SQL, Snowflake, Visual Studio, Azure Devops
<b>Duration:</b>	October/2022 – Present

### Roles & Responsibilities :

- Analysing data and writing SQL queries to extract data for reporting purpose.
- Responsible for meticulously analyzing stored procedure data documentation, including thorough documentation of data columns, data population procedures, and logic calculation processes for client reference.
- Worked on optimization tickets to improve the performance of queries & stored procedures.
- Creating stored procedures for the new Development.
- Updating existing stored procedures in case of any enhancement or modification request by the user.
- Performed Unit Testing and Regression Testing.
- Collaborating with users and stakeholders understanding the requirements & developing according to them.
- Conducted training session for SQL
- Deploying code in QA and UAT with help of Visual studio
- Good experience in fine tuning of SQL Queries, Procedures, Functions.
- Design and implement features for identity and access management
- Conversion of Sql server code to snowflake environment.
- Experience in creating and maintaining Azure Boards, Pipelines, Repos, Artifacts, Test Plans and Email Configuration for pipelines.
- Experience in continuous monitoring of Azure Pipelines (CI/CD).

**Project Details:**

<b>Project Name:</b>	DQE Nhance
<b>Role:</b>	SQL Developer
<b>Environment:</b>	HIVE, Postman, MS-SQL -2012,2016, PL/SQL.
<b>Duration:</b>	October/2020 – October 2022

**Roles & Responsibilites :**

- Understanding new BRD's & developing as per requirement.
- IDQ to DQE across 50 systems involving 250+ stakeholders. Followed Agile methodology (scrum calls, rolling dev-uat cycle, monthly release drops) and delivered the project within 5 months.
- Data base operational support to the service team.
- Analysing data and writing SQL queries to extract data for reporting purpose.
- Creating stored procedures for the new Development.
- Updating existing stored procedures in case of any enhancement or modification request by the user.
- Performed Unit Testing and Regression Testing.
- Resolving critical UAT issues of users.
- Good experience in fine tuning of SQL Queries, Procedures, Functions
- Collaborating with users and stakeholders understanding the requirements & developing according to them.
- Training users regarding the environment.
- Deploying code in QA and UAT with help of Postman tool.
- Running basic commands to process & on board files in LINUX.
- Interacting with users of different countries & sorting out their issues.

**Project Details:**

<b>Project Name:</b>	Titan
<b>Role:</b>	SQL Developer
<b>Environment:</b>	MS-SQL -2012,2016, PL/SQL
<b>Duration:</b>	July/2019 – September 2020

**Roles & Responsabilites :**

- Data base operational support to the service team.
- Analysing data and writing SQL queries to extract data for reporting purpose.
- Creating stored procedures for the new Development.
- Updating existing stored procedures in case of any enhancement or modification request by the user.

- Testing from front-end UI with regards to data retrieved as a result of stored procedures execution at the backend
- Performed Unit Testing, Smoke testing and Regression Testing.
- Resolving critical\_UAT\_issues within the SLA.
- Good experience in fine tuning of SQL Queries, Procedures, Functions

**Academic Credentials**

Degree and Date	Institute
B.E	Andhra Loyola Institute of Engineering & Technology
